

Dear Valued Member,

Thank you for being part of the Reclaim Fitness family. Looking back, we are so fortunate to have been be part of the Lincoln Way community for the past 17 years and this would not be possible without your trust, loyalty and dedication to working out.

Our June re-opening has been a great success and we have made many monumental changes to better serve and protect all of our members. You are our priority and we would like to take this opportunity to recap the changes that have been made and share the new ones coming.

RCF has deployed the most extreme cleaning, disinfecting and social distancing protocols possible. These protocol measures reach far beyond what is now deemed standard. Upon arrival, all members, guests and staff have their temperature taken. We provide individual towel service and disinfectant spray bottles allowing members to wipe down their equipment before and after each use. All equipment has been spaced at least 6 feet apart.

Antimicrobial film has been installed on all door handles, push bars, water fountains, ADA grab bars and sinks. We have installed heat shrink sleeves on all toilet and urinal handles. What does this mean? (SILVER-ION-TECHNOLOGY) These almost invisible films are embedded with an EPA approved antimicrobial active agent that continuously interacts with and deactivates germs and bacteria that are deposited by facility occupants on a daily basis. These slow-release silver-embedded antimicrobial tapes and sleeves go beyond traditional cleaning and sanitization practices. Antimicrobial-treated surfaces reduce the presence of illness-causing germs and physically suppress the growth of microorganisms. Studies have shown this technology to be an effective intervention to the transmission of germs from one person to another and thus reducing the chances you or our staff of getting sick. See specific results of studies conducted on SafeHandles <Breaking the chain>.

EPA Approved COVID-19 Sanitizing Agent PURE Cleaner is now standard protocol at Reclaim Fitness which is applied with our state-of-the-art Electric Fogging Unit. **PURE BIOSCIENCE'S PURE® HARD SURFACE DISINFECTANT ADDED TO EPA'S COVID-19 DISINFECTANT LIST.**

RANCHO CUCAMONGA, CA (Mar 17, 2020) – PURE Bioscience, Inc. ([OTCQB: PURE](#)), creator of the patented non-toxic silver dihydrogen citrate ([SDC](#)) antimicrobial, today announced its PURE® Hard Surface disinfectant (EPA Reg. No. 72977-5-73912) has been added to the U.S. EPA's List N: Disinfectants for Use Against SARS-CoV-2 (the EPA's expanded list of disinfectants for use against COVID-19) based on its efficacy against the Human Coronavirus.

PURE's Chairman and CEO Tom Y. Lee said, "On the heels of our first order to Asia, we are pleased to announce our highly efficacious PURE Hard Surface has been added to the expanded EPA COVID-19 Disinfectants List to help combat the spread of COVID-19.

#### **PURE Hard Surface**

Formulated for ease of use, Pure® Hard Surface doesn't Require precautionary measures during use. This food contact surface sanitizer is safe to use in your kitchen, bathroom, vehicle and just about anywhere, even around kids and pets. The hybrid formula is non-caustic, non-toxic and non-irritating, making it safe for anyone to use in any environment. Pure® Hard Surface kills common bacteria for up to 24-hours.

PURE® Hard Surface is an EPA registered food contact surface sanitizer and disinfectant, powered by the patented Silver Dihydrogen Citrate (SDC) molecule. PURE Hard Surface delivers broad spectrum power to eliminate

dangerous pathogens in a wide range of environments. **Fast and Effective**

PURE Hard Surface rapidly eliminates bacteria, viruses and fungi, including multiple drug resistant organisms (CRE, MRSA, VRE), Human Coronavirus, Norovirus, Hepatitis B and C, *Listeria*, *E. coli* and *Salmonella* with kill times as fast as 30 seconds.

### **Approved for Food Contact Surfaces**

PURE Hard Surface has been approved for use on food contact surfaces without the requirement of a rinse. Only silver in the form of SDC is cleared for this use under 40 CFR 180.940 and PURE Hard Surface has an NSF registered D2 Classification.

### **24-Hour Protection**

PURE Hard Surface is a ready-to-use EPA approved sanitizing agent and contains no bleach, ammonia, phosphates, phenols or VOC emitting compounds. This odorless formula is non-caustic and non-irritating, providing a better user experience.

**Touch Point Surface Testing** to ensure our level of cleanliness is on point. How? ATP testing. What is this?

Hygenia Reader.....

Adenosine Triphosphate, or ATP, is the energy molecule found in all living things, making it a perfect indicator when trying to determine if a surface is clean or not. Food and beverage processors use ATP systems to rapidly verify surfaces have been cleaned thoroughly so that new product runs are not contaminated by prior product runs, and to ensure biofilms are not developing on the surface that could affect quality.

With an ATP hygiene monitoring system, (or sometimes referred to as - an ATP sanitation monitoring system), ATP is brought into contact with Hygenia's unique liquid-stable reagent in the test device. Light is then emitted in direct proportion to the amount of ATP present in the sample, providing information on the level of contamination in seconds.

We have also installed ActivePure **Technology Air Scrubbers** in our facilities.

### **ActivePure® Technology?**

**Everyone is increasingly concerned about their potential exposure to allergens, mold, VOCs and air pollutants, and for good reason: allergies affect more and more people, and respiratory issues like asthma continue to be on the rise.**

**ActivePure® Technology goes beyond traditional air purification systems by not only eliminating stale odors and reducing dust, but actually eliminating harmful contaminants\* in the air and on the surface**

Please remember to ask yourself a few questions before leaving your house. Not to only visit Reclaim Fitness, when visiting anywhere.

1. Have you had any signs or symptoms of a fever in the past 24 hours such as chills, sweats, felt "feverish" or had a temperature that is elevated for you? 100.4 or greater?
2. Do you have any of the following symptoms? Cough? Shortness of breath or chest tightness? Sore throat? Nasal congestion? Body aches? Loss of taste or smell?
3. Have you traveled internationally in the last 14 days? Or have you had any close contact in the last 14 days with someone diagnosed with COVID 19?

4. If you have a fever stay home. If you have a combination of any 2, please stay home.

A Few Things to Remember: *All members are required to check in and out*

- Each and every member is required to work out with a mask when social distancing cannot be practiced, when not exercising, in between sets and when socializing
- As a courtesy to other members and peace of mind, always wear a mask when not working out
- Each and every member is required to work out with a disinfectant spray bottle and cleaning towel. RCF will be providing cleaning supplies.
- Each and every member is required to wipe down their equipment before and after each use
- Kids room closed. Re open date TBD.

Thank you for your continued support and we look forward to another 17 years serving you.

In Great Health! RCF Staff and Management
